# Live Better, Naturally

Life presents us with a variety of challenges, from muscle stiffness and joint discomfort to the hustle and bustle of daily life. While traditional treatments like medication and physical therapy are effective solutions, there are also simple, natural methods that can boost your well-being.

For centuries, people have celebrated the soothing properties of warm water to ease aches, pains, and stress. From the luxurious baths of ancient Rome to today's inviting hot tubs, immersing ourselves in warm water can lead to remarkable physical and mental rejuvenation.

If you are seeking a gentle, natural remedy to alleviate discomfort or to unwind after a hectic day, consider the profound effects that a warm soak can have on your overall health and your ability to live better, naturally.

# Remarkable Benefits

Experience relief from life's everyday aches, pains, and stresses with the natural healing power of hot water. Whether it's muscle stiffness, arthritis, or simply the stress of work and family life, these issues can take their toll on both our bodies and our minds. Discover more about the remarkable benefits of a warm soak for your health and well-being.

## Hydrotherapy

Hydrotherapy, or the therapeutic use of water, has been refined over centuries, drawing from ancient civilizations. In today's hot tubs, strategically placed spa jets stimulate blood circulation, promote muscle recovery, and reduce anxiety.

## Start sleeping well, tonight

Struggling to sleep? A hot tub can help. Its hydrotherapeutic properties reduce stress and relax muscles, making it easier to fall asleep and stay asleep longer.

## Same stress, new relief

Hot water has been used for centuries to relieve stress by improving circulation, calming the nervous system, and alleviating pain. Immersion in hot water releases endorphins, increases blood flow, and provides therapeutic benefits.

## Quality family time

Quality family time can be hard to come by. A quick dip in a hot tub provides an opportunity to unplug from distractions and strengthen connections. Experiencing the health benefits together fosters stronger, more balanced relationships.

## Relief from arthritis pain

Hot tubs offer relief from arthritis through hot water therapy, alleviating stiffness and providing immediate pain relief. Regular spa usage can reduce joint inflammation and improve muscle elasticity, managing arthritis symptoms proactively.

# The Viking Difference

Family-owned and American-built, high-quality materials and superior components are the cornerstone of every Viking hot tub. Each spa is meticulously crafted with careful workmanship and an unwavering attention to detail, ensuring that every aspect of the hot tub is designed to last for years to come.

## Energy efficient

The hot tub industry follows the energy standards set by the California Energy Commission (CEC) for all portable spas. Viking Spas makes sure that all its hot tubs meet or exceed these standards with its Arctic insulation. This insulation includes a 2lb polyurethane foam sprayed onto the underside of the shell, followed by the installation of foam boards and a temperature shield material attached to the backside of the cabinet panels.

## Performance

The Viking Spas Hydraulic System (VSHS) is comprised of industry leading components that have been designed specifically for each model to provide optimum jet performance and water filtration.

### Custom fit cover

Each Viking hot tub comes with a custom fit cover made of high R-value foam and weather-resistant fabric to keep water hot and prevent debris from getting in.

### High-quality components

All hot tubs are built with high-quality components. Each model has a durable bottom made of HDPE plastic to protect your hot tub and ensure longevity.

# Revitalize and Renew

Hydrotherapy is essential to the hot tub experience. Powerful jets release a combination of water and air, creating a soothing and invigorating massage. These jets come in different sizes and feature directional and rotating nozzles, allowing for precise and customizable relief to specific areas of the body.

**1** Our swing seat is designed with versatility in mind. You can adjust your seating position to personalize your massage, engage in conversations, and enjoy breathtaking views of the sunrise or sunset, all from the same seat.

**2** The Elite series pillow has a dynamic design that lets you easily adjust the height of the pillow for unparalleled comfort and tailored support. The hollow structure ensures a plush, cushioned feel.

**3** Whether you need a low back, full back, foot, or neck massage you'll find targeted massage points throughout every Viking hot tub.

**4** Easily rotate the face of a jet to turn it off or on. Turning off a jet(s) increases flow to other jets allowing you to target specific areas or simply enjoy a seat with no jet action.

**5** Use the air valves to customize your massage by decreasing or turning off the amount of air mixing with water coming from the jets.

**6** Available on select models, the diverter valve redirects the water flow between groups of jets or share the water flow between more jets for all to enjoy.

# Built for Wellness

## Everclear water care – crystal-clear water, made simple

Experience spa water the way it was meant to be—clean, clear, and naturally inviting. Everclear water care combines advanced ozone and UV technologies to reduce chemical use, simplify maintenance, and create softer, healthier water with less effort. The ClearGuard CD ozone system is standard on our Elite and Heirloom models (optional on Element models), while the ClearGuard UV Purification upgrade is available for Elite and Heirloom models only. Together, these systems form the ultimate Everclear experience—delivering crystal clarity and peace of mind, so every soak feels pure, effortless, and rejuvenating.

### ClearGuard CD Ozone

Enjoy softer, clearer water with the power of ozone. The ClearGuard CD Ozone system neutralizes contaminants and helps reduce the need for harsh chemicals, leaving your hot tub water naturally inviting. Standard on our Elite and Heirloom models—and available for the Element series—this system makes spa care easier, so you can spend more time enjoying your soak and less time worrying about water quality.

### ClearGuard UV Purification

Enhance your spa's water with UV purification. The ClearGuard UV system inactivates bacteria, viruses, and other contaminants, reducing the need for chemical sanitizers while keeping water crystal clear and healthy. It's a simple, natural solution that complements your routine spa care, letting you relax and enjoy a cleaner, safer soak every time.

## Everlast spa shell

Discover the comfort and durability of our Everlast spa shell, designed to feel luxuriously soft and slip-resistant for added confidence while you relax. Built to stand the test of time, Everlast comes with a limited lifetime warranty and is exceptionally durable. Choose from a range of natural, calming colors that create a serene backdrop for your hot tub, turning every soak into a truly rejuvenating escape. Its smooth, inviting surface enhances the overall spa experience, making every moment in your hot tub feel effortlessly comfortable and indulgent.

## Air X® advanced jetting system

Experience a completely new kind of hydrotherapy with the Air X advanced jetting system. Unlike traditional spa jets, Air X injects more air and less water to create a soft yet powerful massage that soothes muscles without feeling harsh. Each jet offers two distinct flow patterns, giving you a variety of massage sensations—from gentle, cloud-like pressure to more targeted, invigorating relief. Whether you're seeking a relaxing unwind or a therapeutic massage, Air X transforms select spa seats into a true soft-tissue therapy experience.

# Feel the Difference

Attention to detail makes all the difference. Viking hot tubs are equipped with a variety of features that work together to enhance your experience, whether you're unwinding, spending time with loved ones, or seeking relief. Every detail is designed to ensure a consistently exceptional experience.

#### **Premium LED lights**

Choose from seven distinct colors (*Red, Green, Purple, Light Blue, Aquamarine, Pink, and Dark Blue*) or a calming loop to set the mood for your warm water experience while enjoying the soft glow of the exterior corner lights to enhance your outdoor space.

#### **Infinity-Edge water feature**

The Infinity-Edge water feature is a beautiful complement to your hydrotherapy routine. Find serenity as you relax in seat just below and experience the caress of cascading water on your back.

# Elite Series

The Elite series of hot tubs is designed to provide the ultimate relaxation and rejuvenation experience. Each model in this series is equipped with a range of premium features that are tailored to enhance your comfort and well-being. With ergonomic seats in varying heights to accommodate any user and adjustable pillows for personalized luxury, these models offer unparalleled comfort. Treat yourself to the luxury and comfort of the Elite series and elevate your relaxation to new heights.

ELITE SERIES

# Heritage

Immerse yourself in the luxurious comfort of our largest lounge hot tub, the Heritage. This meticulously crafted design leaves nothing to chance, delivering powerful hydrotherapy with features like the Volcano floor jet and the targeted neck jets in the spacious captain's chairs. Elevate your outdoor hot tub experience with this thoughtfully designed model for ultimate head-to-toe relaxation and rejuvenation.
